INTERNATIONAL SEAPORT

BUILDING TRUST

SEAPORT CONSTRUCTION AS A SPECIAL CHALLENGE

PROJECT DESCRIPTION

The goal of the project is to invest in the construction of container terminals that can receive 18,000 TEU container ships in Lach Huyen port area in order to gradually build a modern container port area according to the approved plan; meet the demand for export, importing goods of the Northern region directly to the European and American markets; make the most of the advantages of natural conditions and geographical location to develop Dinh Vu – Cat Hai Economic Zone (seaport system, logistics and industrial parks behind the port) to promote the socio-economic of Hai Phong city in particular and the Northern region in general.

- Location: Lach Huyen Port Area, Cat Hai Special Zone, Hai Phong City
- Project size: 57.3 hectares
- Timeline: July 2022 - Feb 2025

PROJECT REQUIREMENTS

- Concrete Requirements: Excellent resistance to corrosion and degradation in marine environments, including sulfate and chloride attack.
- Balance between quality and affordability.

PROJECT PARTICIPANTS

Owner: Hateco Group

SIKA SOLUTIONS

We provided Technical support that addressed the concrete requirements by assisting in mix designs, which we strictly control to ensure long service life and high durability against chloride penetration and chemical attack from seawater.

Our solutions focus on sustainability, driving the creation of infrastructure that stands the test of time while keeping its carbon footprint to a minimum. We pair eco-conscious design with durable solutions to deliver projects that are as kind to the planet as they are resilient.

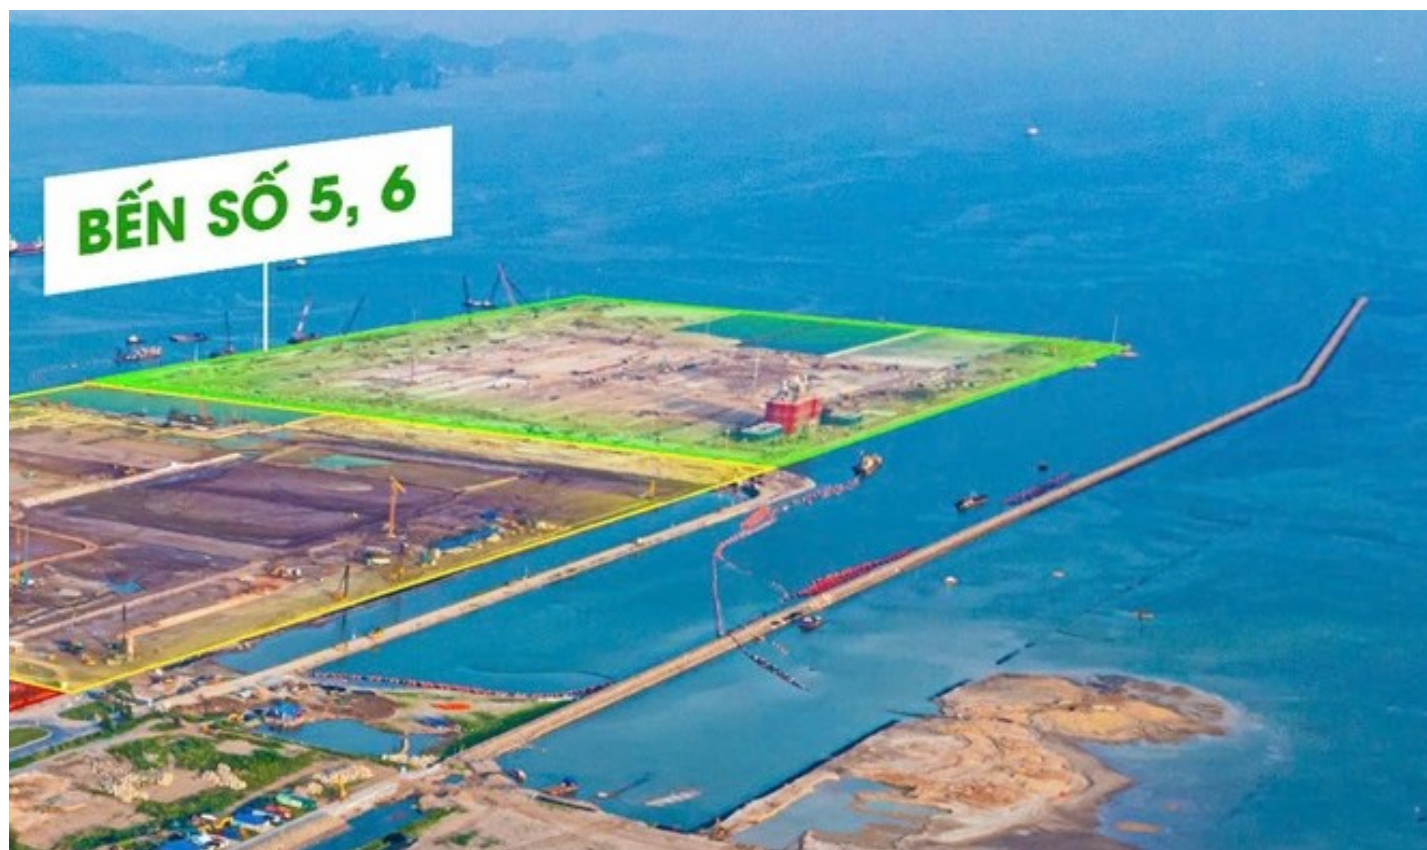

Moreover, our technical breakthrough in marine-environment durability gives us a clear technical edge. By engineering structures to resist harsh coastal conditions, we ensure long-lasting performance even in the most corrosive saltwater settings.

SIKA PRODUCTS

- Sikadur®-732
- Sikadur®-31 Normal CF
- Sika Refit®-2000
- Intraplast® Z HV
- SikaGrout®-214-11
- Sika® Latex
- Sikacrete® PP-1
- Sika® Rugasol F
- Sika® Rugasol C
- SikaPlast®-166 SR
- Sikadur®-752
